

R VISION DOME

PORTABLE RAPID DEPLOYMENT DIGITAL RECORDING SYSTEM

What is a Rapid Deployment Digital Recording System?

Rapid deployment camera system is a portable, outdoor wireless surveillance camera that has been developed for the following situations:-

- Monitoring Anti-social behaviour
- Monitoring Crime Hot Spots.
- Environmental management and control.
- Monitoring neighbourhood nuisance.
- Damage control and stopping graffiti
- Security at public events.
- Drug misuse surveillance.
- Traffic and transport surveillance.

How does our portable security system work?

GSM

Similar to a mobile phone this portable security system uses GSM mobile networks to transmit images via satellite without the need of any cabling. Our preferred service provider is Vodafone due to their high speed data capability.

Wired and Wireless IP Networks

Wired local area networks (LAN) and wide area networks (WAN) can be utilised to transmit portable security system data. Cameras can be deployed and re-deployed anywhere there is network connectivity.
